Milestones 1–4 | Project Output Gallery

This document presents the dashboard screenshots provided for the project. Captions describe the visible dashboard themes and do not add unverified results.

Milestone 1 — Inventory Turnover Dashboard

Milestone 1 – Output Screenshots

The following screenshots document the main output views produced during Milestone 1.

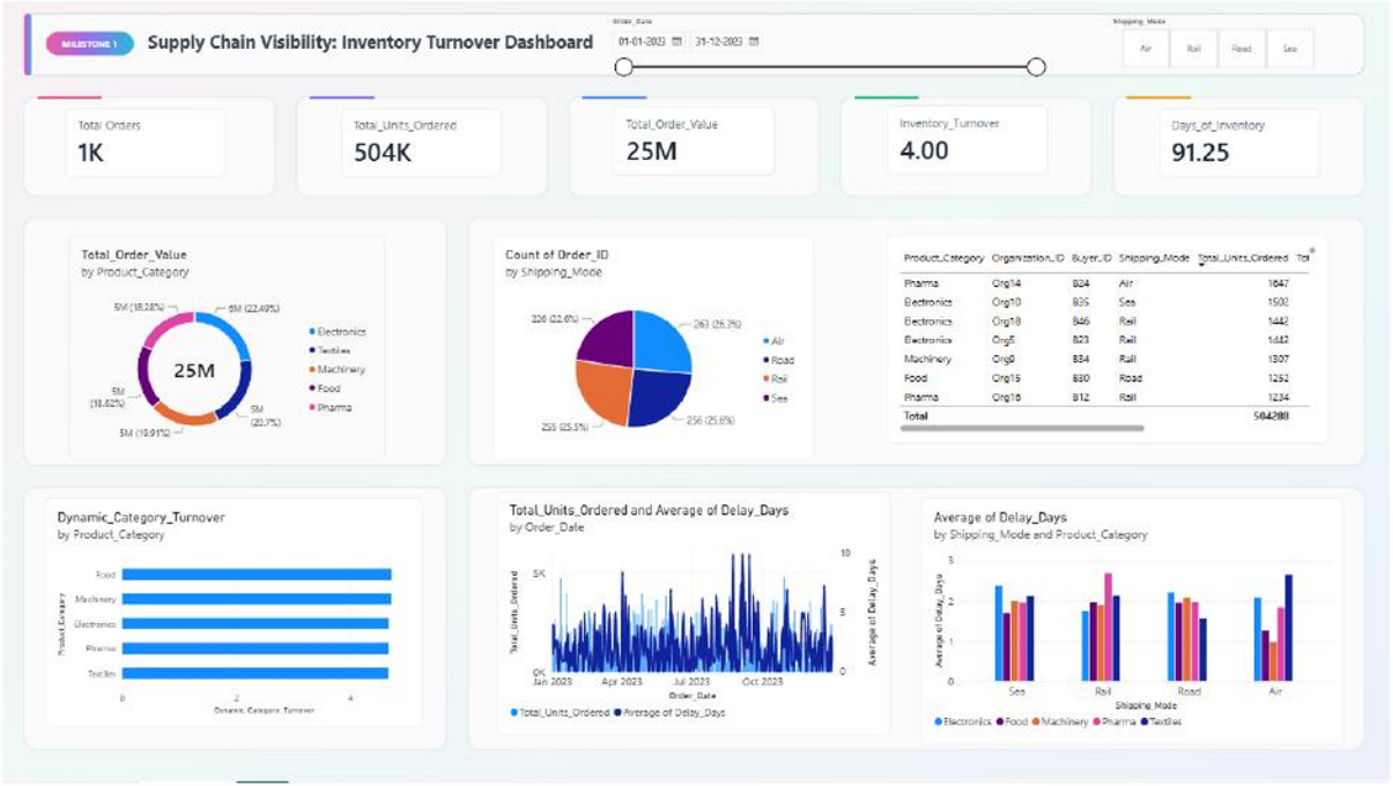

Figure 1. Milestone 1 – Overall 2023 dashboard

Overall 2023 dashboard showing inventory turnover, order values, units ordered, shipping modes, and category-level analysis.

Milestone 2 – Output Screenshots

The following screenshots show the major output states documented for Milestone 2.

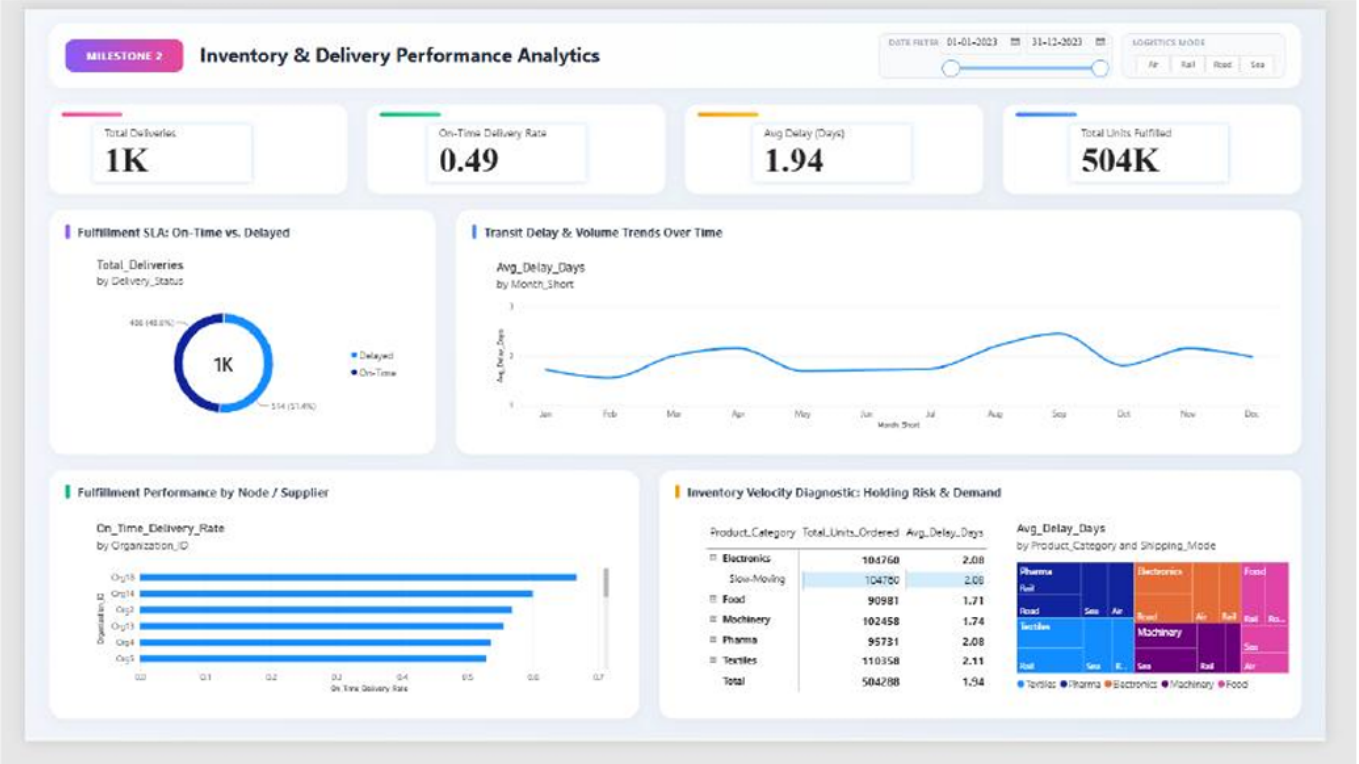

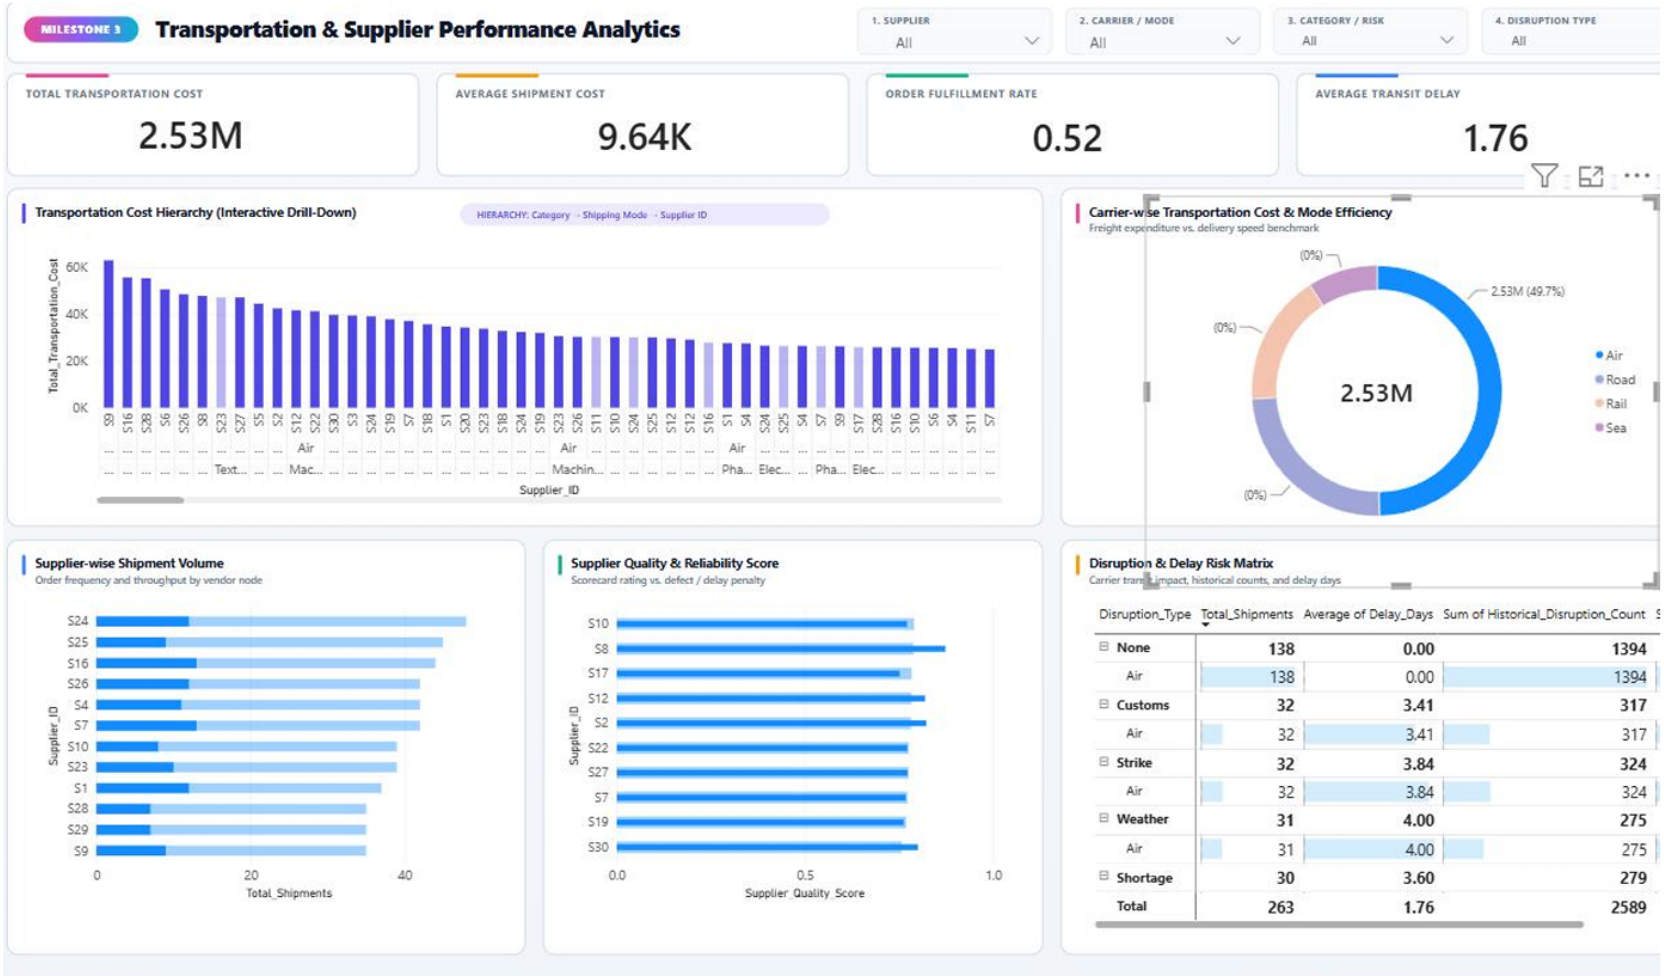

Figure 2. Milestone 2 – Overall full-year dashboard

Full-year view of delivery performance, delay trends, supplier or node performance, and inventory velocity.

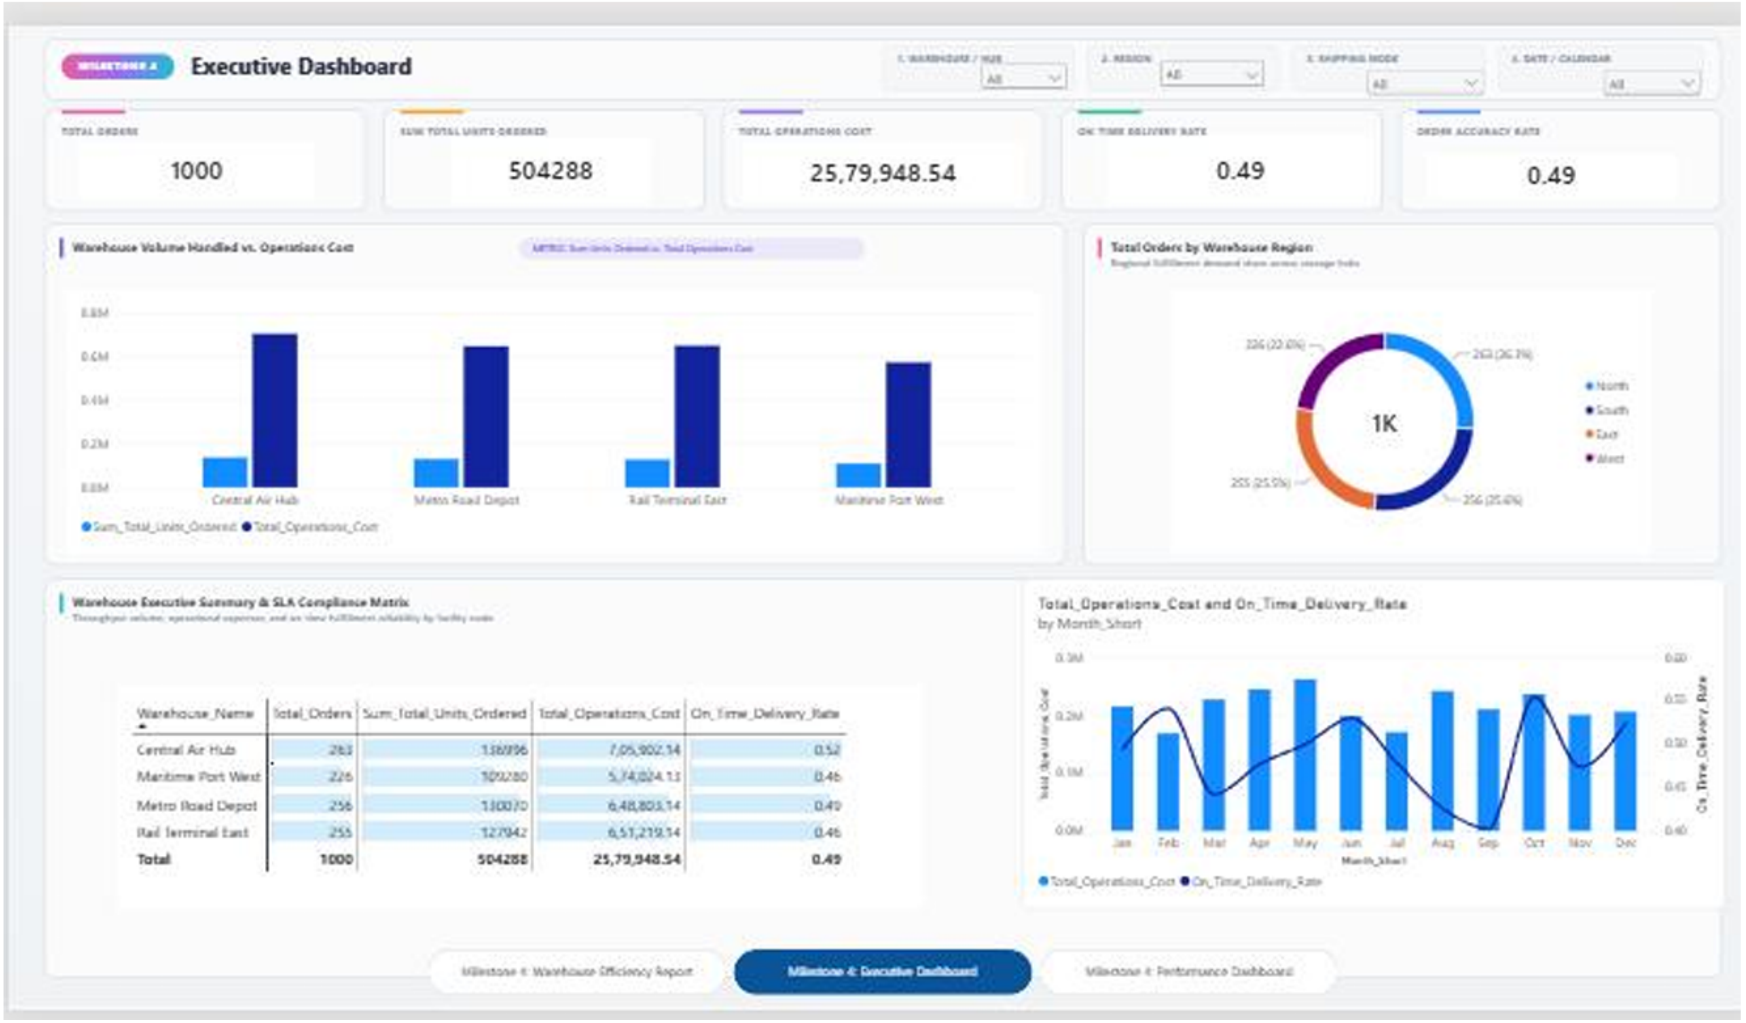

Milestone 3 — Transportation & Supplier Performance Analytics

The following screenshot represents the final Milestone 3 dashboard output.

Transportation cost, shipment cost, order fulfillment, transit delay, supplier shipment volume, supplier quality, and disruption-risk views.

Milestone 4 — Executive Dashboard

Executive summary of warehouse orders, units ordered, operating cost, on-time delivery, and warehouse-region performance.

Milestone 4 — Warehouse Efficiency Report

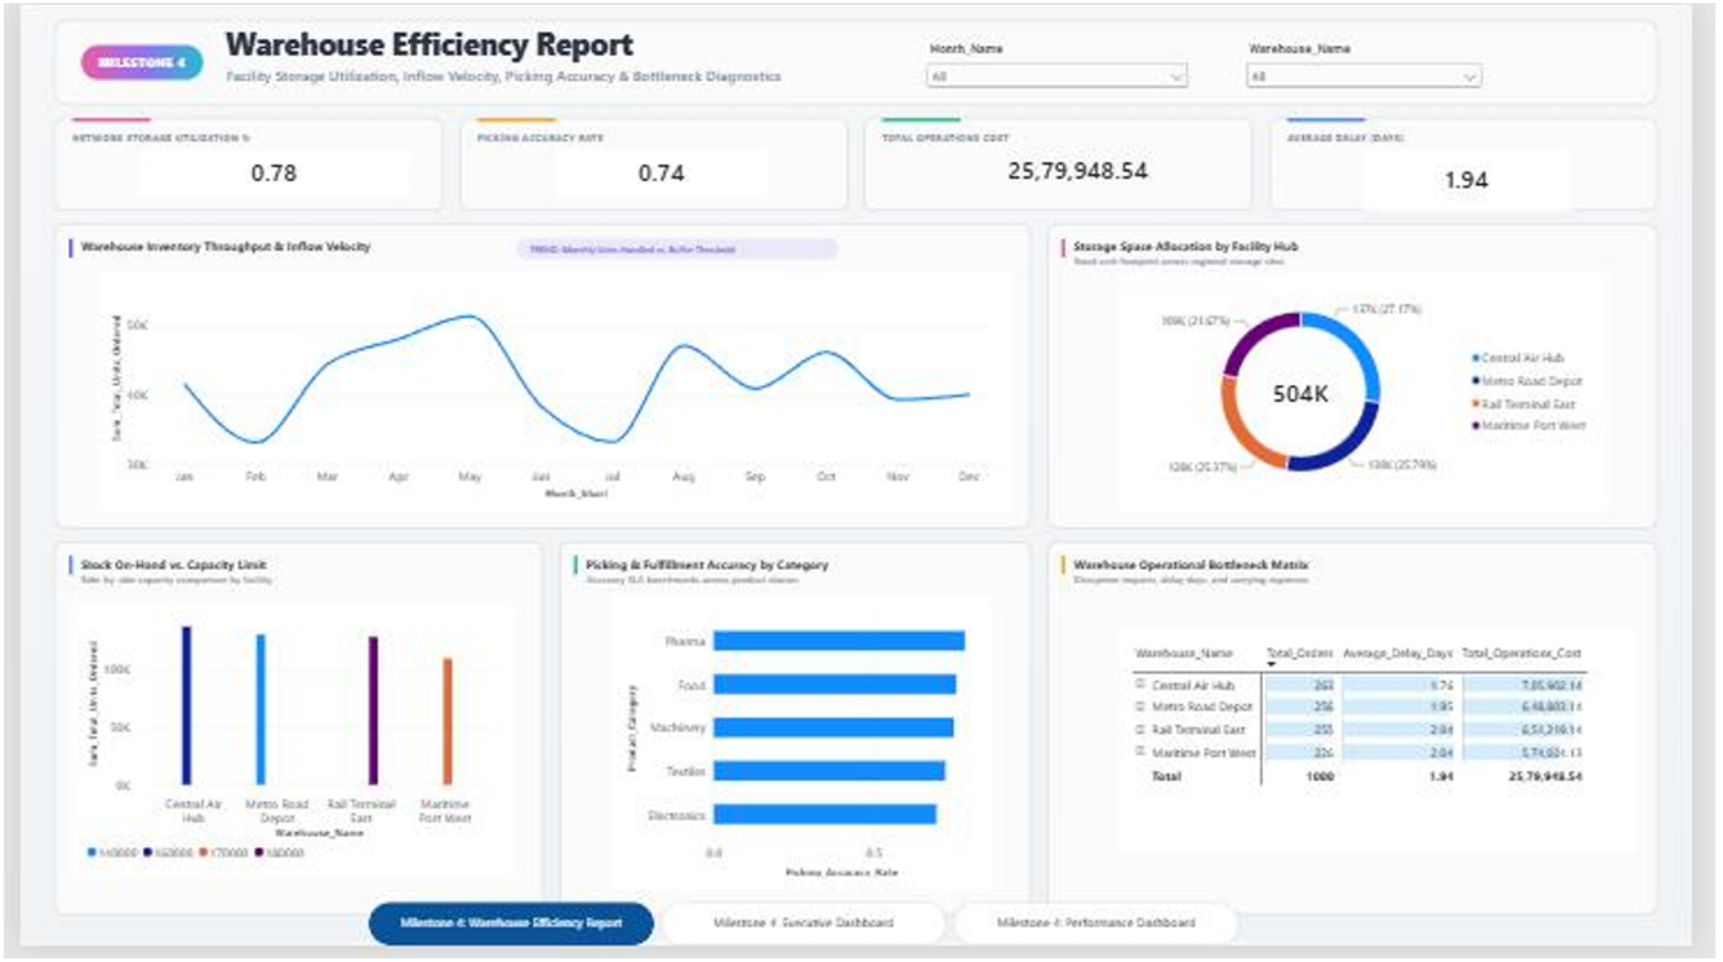

Figure 12.2. Milestone 4 – Warehouse Efficiency Report

Warehouse utilization, picking accuracy, operating cost, delay trends, storage allocation, and operational bottleneck analysis.

Milestone 4 — Performance Optimization Dashboard

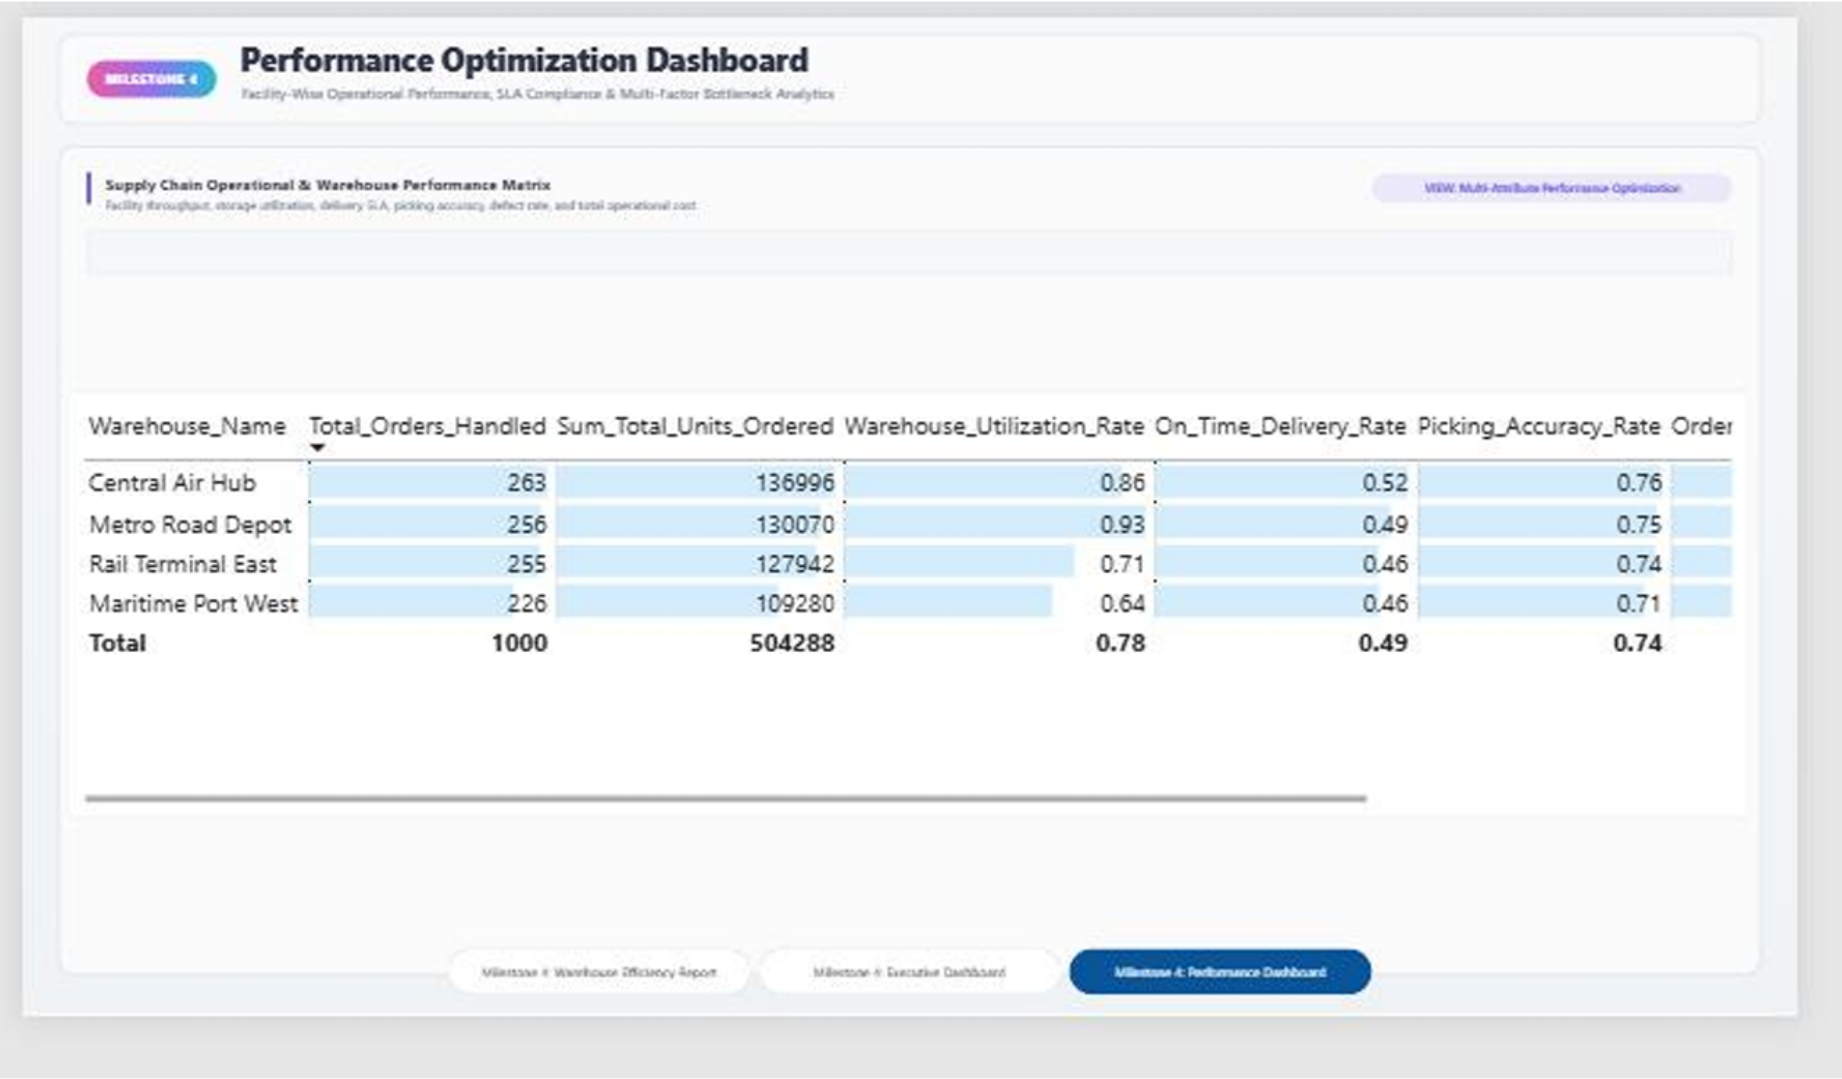

Figure 12.3. Milestone 4 – Performance Optimization Dashboard

Warehouse-level performance comparison across orders handled, units ordered, utilization, on-time delivery, and picking accuracy.
